

SNR has one of the most comprehensive ranges on the market:

- Tensioners and Guide Rollers
- Tensioner Kits.

## THE SNR KIT = A QUALITY REPLACEMENT

SNR Tensioner Kits contain all the components required for complete and safe replacement:

- Idler rollers, Tensioners rollers
- Timing belts
- Injection Pump Belts, Camshafts belts, Balancing Shaft Belts if necessary
- Camshaft Pulley damper if recommended by the manufacturer.

Because worn out rollers result in under-tightened belt and the risk of engine failure, always follow the vehicle manufacturers' recommendations and stated service intervals.

## ROLLERS + BELT REPLACEMENT = SAFETY

### SNR: GENUINE OE or ORIGINAL QUALITY PRODUCT

The bearing is a safety critical part: the failure of a tensioner may have catastrophic results. When choosing SNR products, you can be certain of the reliability of your spare part. SNR commits the reputation of its brand in all its components and can therefore propose ranges that consist of genuine OE or original quality parts.

### *SNR, the most car-oriented bearing manufacturer, offers:*
